

# REMOTELY-SENSED MEASUREMENT FOR A RESILIENT AND SUSTAINABLE URBAN FUTURE

Thursday, September 15, 2016 University of Pennsylvania, Lauder-Fischer Hall, Room 303

10:00 AM - 10:30 AM REGISTRATION

10:30 AM - 10:40 AM

INTRODUCTION

Carl Shapiro, Director, USGS Science and Decisions Center Susan Wachter, University of Pennsylvania

10:40 AM - 11:00 AM

OPENING ADDRESS: THE SUSTAINABLE SITES INITIATIVE

Frederick Steiner, University of Pennsylvania

11:00 AM - 12:15 PM

SESSION 1: GLOBAL URBAN GROWTH AND REMOTE SENSING IMAGERY

Martino Pesaresi, European Commission

Patrick Lamson-Hall, NYU Marron Institute of Urban Management

Christopher Small, Columbia University

Eugenie Birch, University of Pennsylvania

Susan Wachter, University of Pennsylvania (Moderator)

12:15 PM - 1:15 PM

LUNCH KEYNOTE ADDRESS: ATLAS FOR THE END OF THE WORLD

Richard Weller, University of Pennsylvania

1:15 PM - 2:30 PM

SESSION 2: MODELS AND SPATIAL DATA FOR A SUSTAINABLE AND RESILIENT URBAN FUTURE

Marc Imhoff, University of Maryland

Mark Montgomery, Population Council

Gilles Duranton, University of Pennsylvania

Peter Christensen, University of Illinois, Urbana-Champaign

Susan Wachter, University of Pennsylvania (Moderator)

2:30 PM - 2:45 PM

**BREAK** 

2:45 PM - 4:00 PM

SESSION 3: IDENTIFYING THE IMPACT OF URBAN EXPANSION ON ECOSYSTEM SERVICES

Richard Bernknopf, University of New Mexico and

Dianna Hogan, USGS Eastern Geographic Science Center

Yuyu Zhou, Iowa State University

Hans-Peter Plag. Old Dominion University

Carl Shapiro, USGS Science and Decisions Center (Moderator)

4:00 PM - 4:30 PM

PERSPECTIVES ON THE DAY

Ken Bagstad, USGS Geosciences & Environmental Change Science Center Jerry Miller, The National Academies of Sciences, Engineering, and Medicine Gregory Snyder, USGS Capabilities and Analysis Land Remote Sensing Program Dianna Hogan, USGS Eastern Geographic Science Center (Moderator)

4:30 PM

PROGRAM CONCLUSION

Carl Shapiro, Director, USGS Science and Decisions Center Susan Wachter, University of Pennsylvania

## **BIOGRAPHIES**

### FREDERICK STEINER

# **RICHARD BERNKNOPF**

Research.

**OPENING REMARKS** 

Frederick Steiner is Dean and Paley Professor, School

M. Rockwell Chair in Architecture at The University of

Texas at Austin for 15 years. He is a Fellow of both the

well as a Faculty Fellow of the Penn Institute for Urban

American Society of Landscape Architects and the

Council of Educators in Landscape Architecture, as

of Design, University of Pennsylvania. Most recently, he

served as Dean of the School of Architecture and Henry

Eugénie L. Birch is Nussdorf Professor of Urban Research, School of Design, and Consumer Economand Co-Director of the Penn Institute for Urban Research, and co-editor of Penn Press's The City in the 21st Century series. She currently chair, **UN-HABITAT's World** Urban Campaign, as well as mental Panel on Climate President of its initiative, into a form compatible with the General Assembly of decision-making processes. Partners toward Habitat III. Working Group III.

### PETER CHRISTENSEN

Peter Christensen is Assistant Professor, Agricultural ics, University of Illinois, Urbana-Champaign. His research uses modeling to investigate urbanization and uncertainty in climate change. He is a contributing author to the Intergovern-Change 5th Assessment Report and member of

### RICHARD WELLER

**GILLES DURANTON** 

Gilles Duranton is Professor of Real Estate, Dean's Chair in Real Estate, The Wharton School, He researches urban and transportation issues, land use, urban growth, and the estimation of the costs and benefits of cities and clusters. He is also interested in the effects of transportation infrastructure on urban development and the ter and PNNL's Joint Global evaluation of local policies.

LUNCH KEYNOTE ADDRESS Richard Weller is Martin and Margy Meyerson Chair of Urbanism, Professor and Chair, Landscape Architecture, School of Design,, University of Pennsylvania. He also acts as Adjunct Professor, University of Western Australia. His research projects have involved scenario planning for cities, megaregions and nations and his current work concerns the application of United Nations (CBD) biodiversity targets.

### MARC IMHOFF

Patrick Lamson-Hall is an urban planner and a research scholar at the NYU Stern Urbanization Project. His research addresses urbanization in the developing world, alternative transportation, and public space. He manages the India Urban Expansion Observatory and the Ethiopia Urban Expansion Initiative, projects to prepare rapidly growing cities spatially.

### **JERRY MILLER**

Richard L. Bernknopf

is Research Professor,

Department of Economics,

University of New Mexico.

Prior, he was an economist

years. His research focuses

the relevance and value of

data including earth obser-

vation and its translation

with the U.S. Geological

Survey for more than 38

on the demonstration of

Jerry Miller is Director, Science and Technology for Sustainability Program, Policy and Global Affairs Division, National Academies of Science,s Engineering, and Medicine. A senior executive with expertise in science and resource management policy with more than 20 years of experience, He is the senior scientist driving policy and program direction on sustainability-related issues.

### MARK MONTGOMERY

Mark Montgomery is Professor of Economics, Stony Brook University and Senior Associate, Poverty, Gender and Youth Program, Population Council in Layer, involving planetary-New York. At Stony Brook he teaches economic demography and econometrics. His current research interests include empirical modeling of urban poverty and health and forecasting city growth with attention to climate related risks.

### **MARTINO PESARESI**

Martino Pesaresi is Scientific Officer, Join Research Centre, the European Commission. He designed the Global Human Settlement size, detailed data analytics from open satellite remote sensing, census data and crowd-sourced information. His research focuses on big remote sensing data analytics, automatic image understanding, machine learning, and spatial sta-

### HANS-PETER PLAG

Hans-Peter Plag is Professor, Ocean, Earth, and Atmospheric Sciences, Old Dominion University. He joined as Co-Director, Climate Change and Sea Level Rise Initiative (CCSLRI) and now is Director, Mitigation and Adaptation Research Institute (MARI). His research focuses on climate change, sustainability, local to global sea level changes, solid Earth geophysics, and Earth system dynamics.

economist at the USGS for over 35 years and is currently Director of the USGS Science and Decisions Center (SDC). SDC's mission is to increase the use and value of scientific information in public policy and societal decisions. He is an adjunct professor of economics in the School of Public Affairs at American University in

### CHRISTOPHER SMALL

Marc Imhoff is Visiting Re-

search Scientist with Uni-

System Science Interdis-

uses Earth observations,

addressing a broad range

held various science and

of sustainability issues. He

leadership roles at NASA's

Goddard Space Flight Cen-

Change Research Institute.

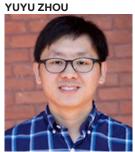

models, and tools for

ciplinary Center, where he

versity of Maryland's Earth

Christopher Small is Lamont Research Professor, Lamont-Doherty Earth Observatory, Columbia University. His research focuses on using satellite remote sensing to quantify changes in Earth's surface and causes and consequences of such changes and encompasses many cross-disciplinary collaborations ranging from tropical deforestation monitoring to urban growth mapping.

Yuyu Zhou is Assistant Professor, Department of Geographic and Atmospheric Sciences, Iowa State University. His research addresses applications of geospatial technologies including remote sensing, GIS, and spatial analytic tools as well as integrated assessment modeling to understanding the environmental change problems and potential solutions for sustainable environments.

### DIANNA HOGAN

Dianna Hogan is Research Physical Scientist, U.S. Geological Survey Eastern Geographic Science Center. Her work focuses on urban land use, stormwater management, and effects on stream hydrology and chemistry, as well as ecosystem services, including the effects of changing land use on service provision, and the use of ecosystem services in decision making.

### **CARL SHAPIRO**

Carl Shapiro has been an Washington, DC.

### **SUSAN WACHTER**

Susan M. Wachter is Sussman Professor and Professor of Real Estate and Finance, The Wharton School. She is former Assistant Secretary for Policy Development and Research, HUD; Co-Director, Penn Institute for Urban Research; and Co-Editor, The City in the 21st Century Series, Penn Press; and Director, Wharton GIS Lab, and SILUS.
